Licensing Notes

More information about licensing and support can be found at *www.pdflib.com*.

What is PDFlib TET PDF IFilter?

TET PDF IFilter extracts text and metadata from PDF documents and makes it available to search and retrieval software on Windows. This allows PDF documents to be searched on the local desktop, a corporate server, or the Web. TET PDF IFilter indexes not only page contents, but also custom metadata, bookmarks and PDF attachments. It is based on the patented PDFlib Text and Image Extraction Toolkit (TET), which is an established developer product for reliably extracting text from PDF documents.

TET PDF IFilter implements Microsoft's IFilter indexing interface. It works with all search products which support the IFilter interface, e.g. SharePoint and SQL Server. Such products use filter programs for particular file formats, e.g. HTML. TET PDF IFilter is such a program, aimed at PDF documents. The user interface for searching the documents may be the Windows Explorer, a Web or database frontend, a query script, or a custom application. As an alternative to interactive searches, queries can also be submitted programmatically without any user interface.

Unique Advantages

TET PDF IFilter offers the following advantages:
- Supports Western text, Chinese, Japanese, and Korean (CJK) text and right-to-left languages such as Arabic and Hebrew
- Indexes protected documents and extracts text even from PDFs where Acrobat fails
- Sophisticated detection of word boundaries and text columns
- Automatic script and language detection for improved search results, important for stemming and other linguistic applications

Enterprise PDF Search

TET PDF IFilter is available in fully thread-safe native 32- and 64-bit versions. TET PDF IFilter can be used with all Microsoft and third-party products which support the IFilter interface, including the following:
- Microsoft SharePoint Server
- Microsoft Search Server
- Microsoft SQL Server
- Microsoft Exchange Server
- Microsoft Site Server

Desktop PDF Search

TET PDF IFilter can be used to implement desktop PDF search, e.g. with Windows Search which is integrated in Windows 8/10/11. TET PDF IFilter is free for non-commercial use on desktop operating systems, which provides a convenient basis for test and evaluation.

Value added Tax (VAT)

PDFlib GmbH's invoicing and VAT handling are governed by EU law:
- Customers from non-EU countries will not be charged VAT.
- Customers from Germany will be charged VAT (MwSt.).
- Customers from all other EU countries must provide a valid VAT identification number. Orders without a valid VAT ID cannot be processed.

See *www.pdflib.com/buy/direct-sales/vat* for more information.

Support

We offer optional support contracts in combination with a new product license or to renew an existing support contract. Active support includes the following advantages:
- technical support with short response times
- all minor (maintenance) and major (functional) updates included
- early availability of bug fixes
- maintenance releases and technical support available until the end of a product's lifetime

- additional licenses can be purchased until the end of the lifetime

Customers without active support can only use the licensed version, but not any later maintenance updates.

The support fee is 20% of the license fee per year.

The fee for one year support renewal is 20% of the license fee of the current maintenance release of the licensed product at the time of renewal.

Support can optionally be renewed automatically every 12 months until it is terminated by the customer.

Scope of a License

One license covers a single computer running on the selected operating system platform. The license includes all virtual machines (VMs) provided the VMs run under the same operating system. Development licenses for machines which are not used for production purposes and run under the same operating system are free with each license. Redundant (backup) machines do not require a separate license, provided they are never used concurrently with the actual production machines. Groups of load-balancing servers require a license for every server in the group.

Invoicing and Delivery

Orders are usually processed within one business day. Customers in the Americas, Australia and Japan will be invoiced in US-$, all other regions in Euro.

After processing your order we will send you an invoice and the license key(s). The software can be downloaded from *www.pdflib.com*.

Volume Discount

Volume discounts are available for multiple licenses of the same product, provided all licenses are ordered with a single combined order:
- 5 or more licenses, updates or upgrades: 10% discount
- 10 or more licenses, updates or upgrades: 15% discount

Please contact us for larger numbers of licenses (see *www.pdflib.com/buy/direct-sales/volume-discounts*).

Major Update

A major update changes an older license to a license for a newer major version on the same platform, thereby invalidating the old license. A valid license key must be supplied with each update order. Licenses for TET PDF IFilter 4 can be updated to TET PDF IFilter 5.5 at a reduced license fee.

Customers without a support contract can add support with a major update. In this case the support fee is based on the full license fee of the product (not the update fee).

to	major update from TET PDF IFilter 4
TET PDF IFilter 5.5	60% of the target product's list price

Minor Update

A minor update changes a TET 5.x license to a license for a newer maintenance release (minor version) on the same platform. The fee for minor updates is 20% of the list price of the target product.

License and Support Conditions

All sales are governed by our General License and Support Conditions which are available at *www.pdflib.com*.
